Made with GAMMA

Breaking the Consulting Interview Barrier

Top consulting firms receive **hundreds of thousands to over a million applications annually**, yet acceptance rates remain **extremely low — typically 0.5% to 1.5%**.

Despite access to frameworks and case books, most candidates fail because they lack **structured practice and meaningful feedback**.

01

Current Preparation Methods

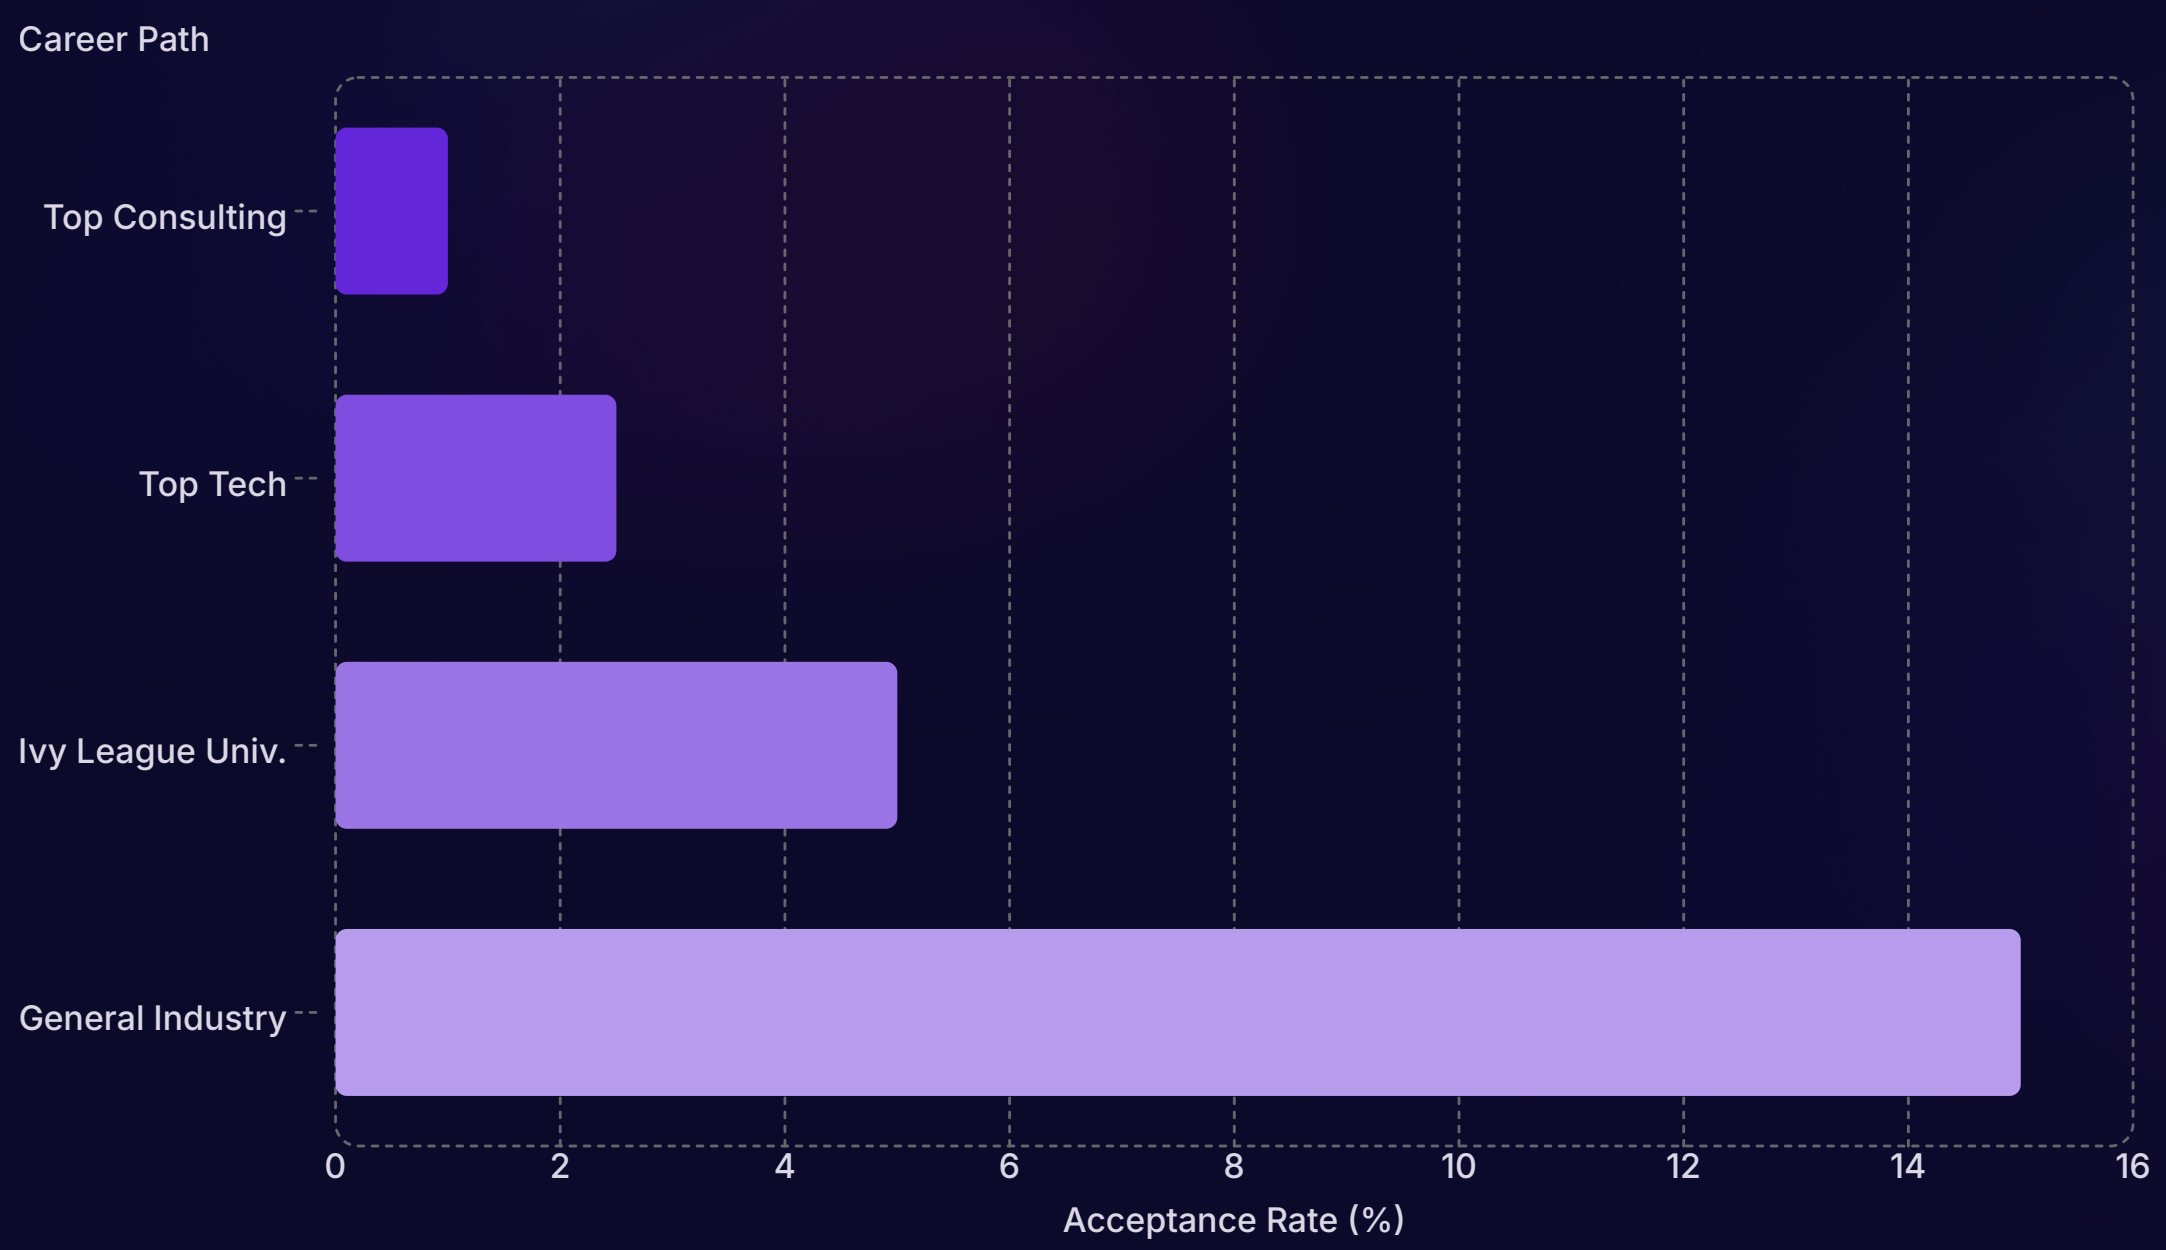
- Random case practice
- Peer feedback with inconsistent quality
- Static case books

02

Resulting Problems

- Inconsistent performance
- Lack of confidence
- No structured improvement

Acceptance Rate Comparison



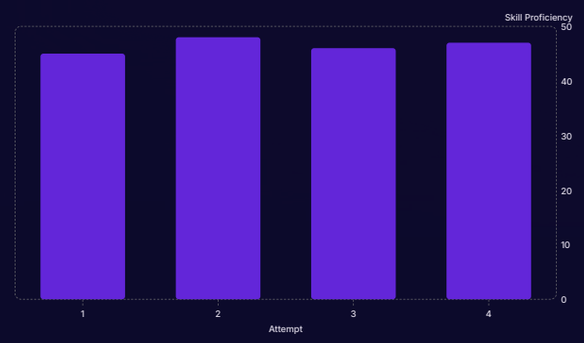
The core issue: Access to frameworks isn't the problem — it's the lack of deliberate practice and structured feedback loops.

Made with GAMMA

Why Case Interview Preparation Fails

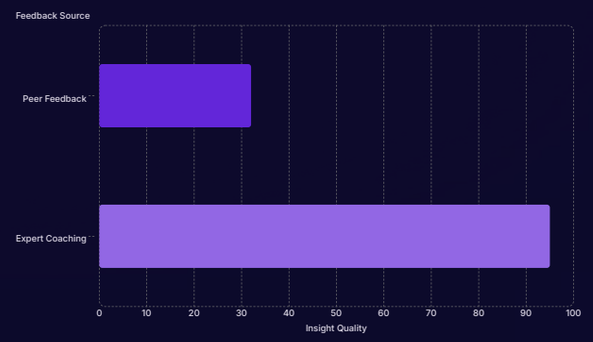
Random Practice

Candidates practice cases in no structured progression, repeating the same mistakes without targeted improvement.



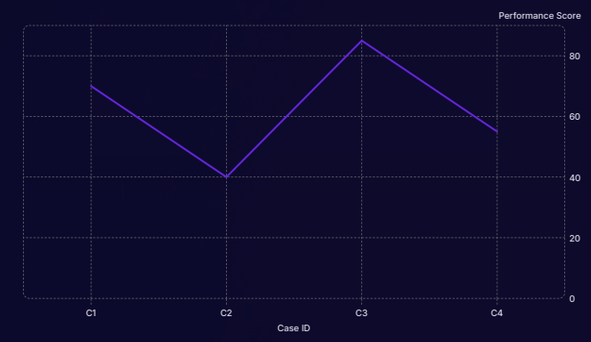
Poor Feedback Quality

Peer feedback rarely identifies true skill gaps or provides actionable insights for measurable growth.



Performance Volatility

Candidates perform inconsistently across similar cases, unable to replicate success under pressure.



Made with GAMMA

Introducing CaseCoach AI

An **AI-powered deliberate practice platform for consulting interviews** that transforms preparation from random practice to structured, measurable skill development.

Voice-Based AI Interviews

Practice with an AI McKinsey-style interviewer that asks structured questions and challenges assumptions in real-time.

Automated Skill Scoring

- Structure
- Problem solving
- Communication
- Creativity
- Confidence

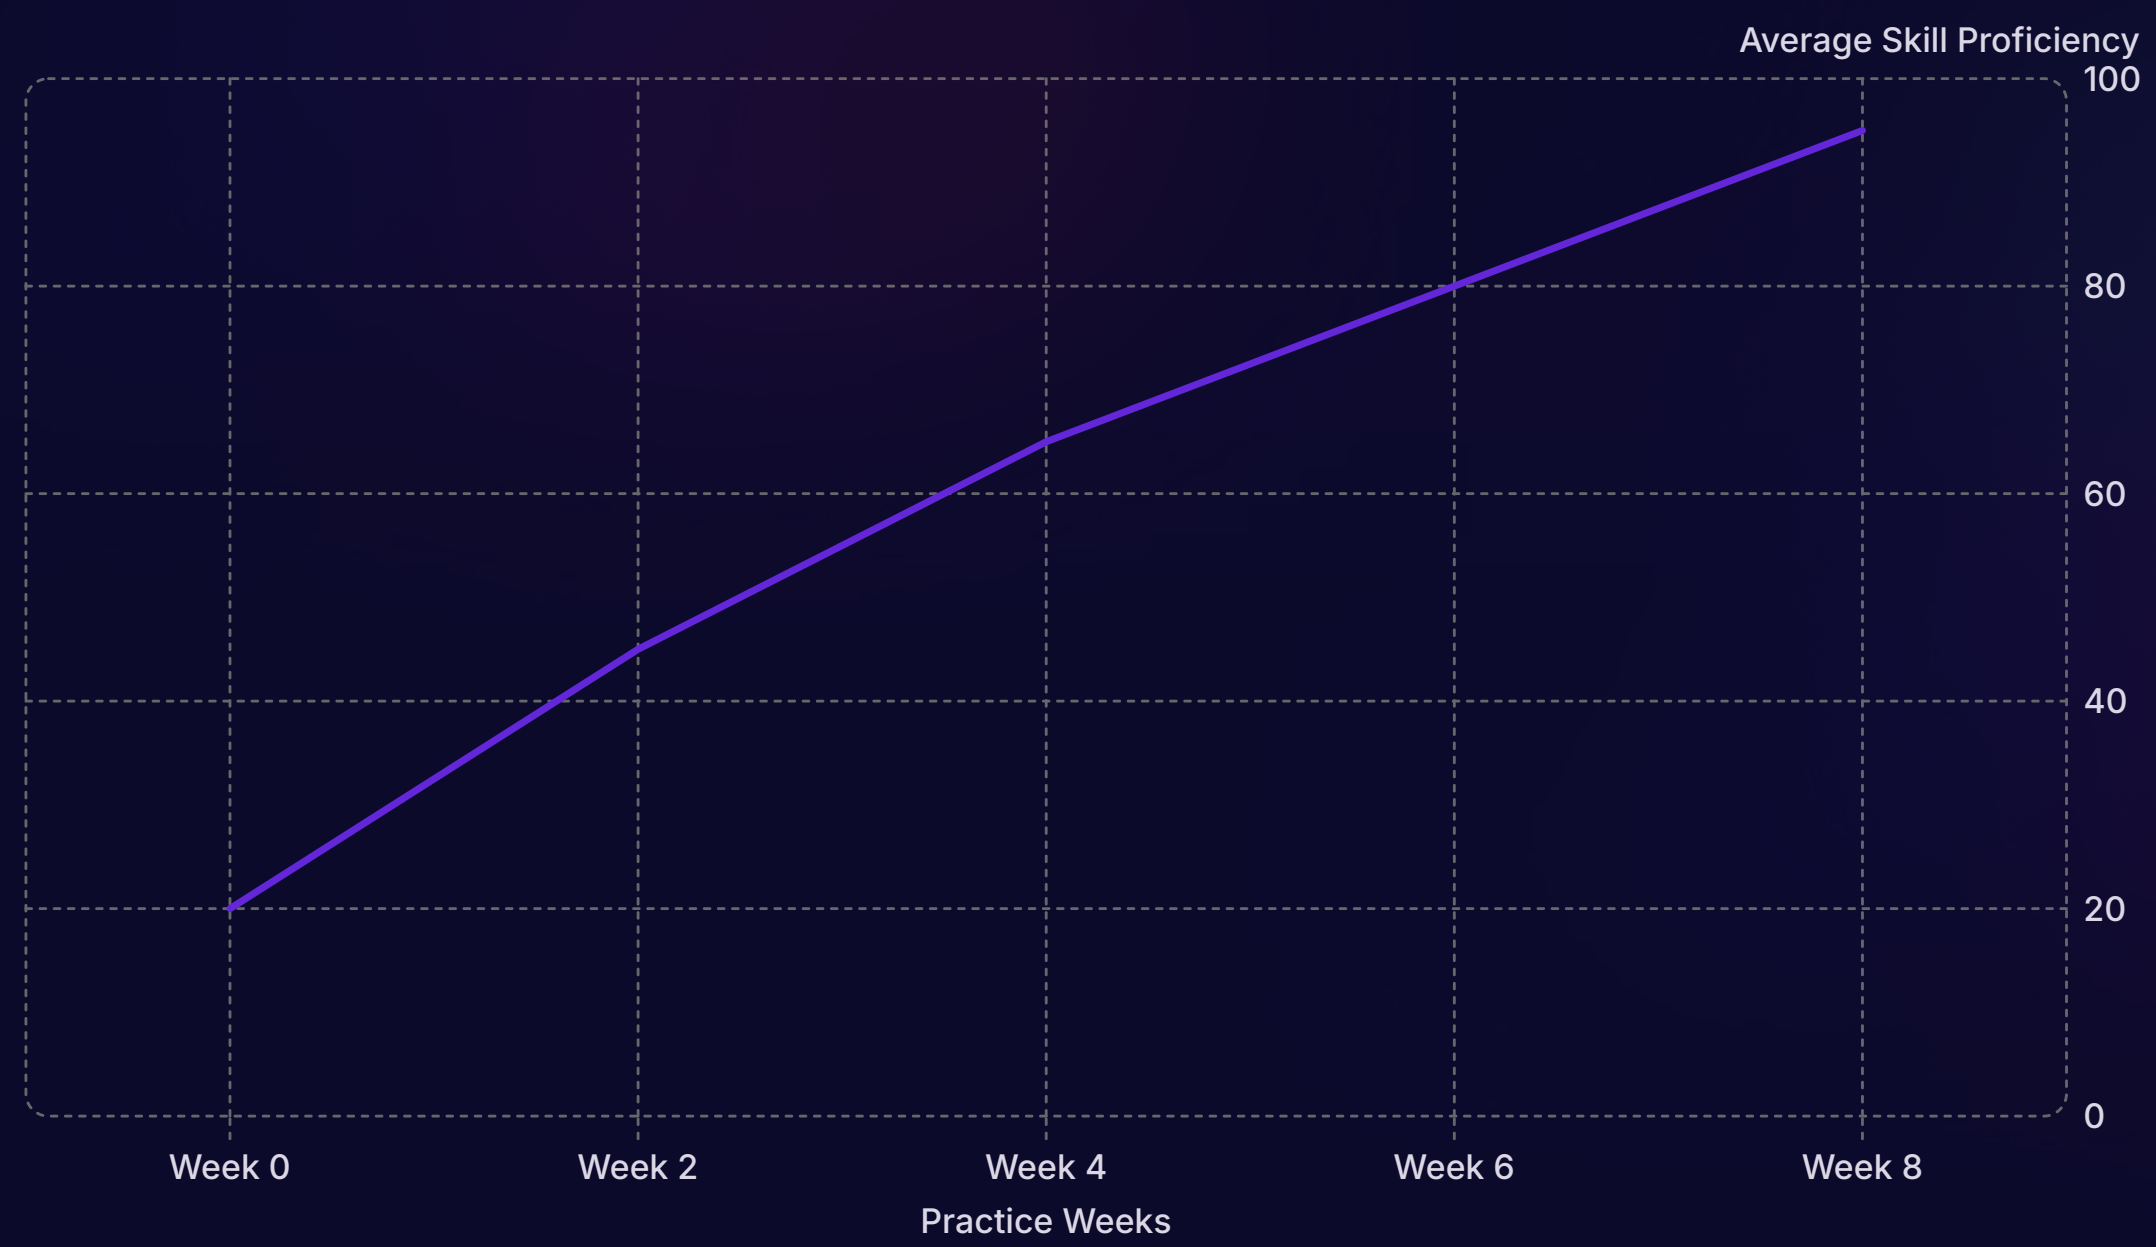
Personalized Progression

Adaptive case difficulty that scales with your skill level, ensuring optimal challenge and growth.

Performance Analytics

Real-time dashboard showing skill trends, improvement areas, and comparative benchmarks.

Skill Improvement Trajectory



This graph demonstrates the rapid growth in core consulting competencies achieved through consistent, deliberate practice with CaseCoach AI, tracking the transition from foundational levels to expert performance.

Live Product Demo

Experience a working prototype that simulates real consulting interviews with **voice or chat-based AI interaction**.

The platform provides **automated feedback** across all critical dimensions: structure, problem-solving, communication, creativity, and confidence.

Key Features Demonstrated

- AI interviewer conversation
- Voice interview simulation
- Automated evaluation
- Skill analytics dashboard

Launch Demo

Massive Market Opportunity

Consulting remains one of the most competitive career paths globally. **Millions of students prepare for consulting roles every year**, creating sustained demand for effective preparation tools.

$100...

Course Pricing

Preparation platforms charge $100–$1,000 per course, demonstrating strong willingness to pay.

<1.5%

MBB Acceptance

Acceptance rates at McKinsey, BCG, and Bain remain below 1.5%, fueling demand for effective tools.

1M+

Annual Applications

Top firms receive hundreds of thousands to over a million applications annually.

Potential Impact

- Faster Skill Development
- Higher Confidence
- Better Outcomes

Building the AI Career Preparation Platform

CaseCoach AI transforms interview preparation from random practice to **AI-driven deliberate practice**, with expansion to high-stakes interview categories.

Future Roadmap

1. **AI Interview Pressure Simulator**
   Simulate high-pressure interview environments to build mental resilience.
2. **Skill Graph Intelligence**
   Detect reasoning gaps and create personalized improvement paths.
3. **Full-Length Mock Interviews**
   Complete consulting interview simulations with comprehensive feedback.
4. **Peer + AI Hybrid Ecosystem**
   Combine AI efficiency with human peer practice for optimal results.

Expansion Market Projections

The line chart illustrates the projected addressable market growth for our three key expansion segments, with Data Science showing the steepest trajectory through 2027.

Core Expansion Categories

- Product Management
- Investment Banking
- Data Science
